A FEW WORDS ABOUT FIT

It is a fact that gun frame dimensions vary from gun to gun. No grip is shipped out unless it fits **our** guns properly. Please keep this in mind.

Because of frame variations, an occasional misfit may be encountered. Don't be alarmed! If your grip does not fit your gun's frame to your satisfaction, we will do whatever it takes to fit your grip, or exchange it for one that will. Most of the time a simple phone call will remedy the situation.

It is imperative to make sure that every gun functions properly with aftermarket grips installed. This is especially important on any firearm that the grip comes in close proximity to working components such as the main-spring, trigger bar, etc. Although the grip functions properly on our guns, it is the user's responsibility to assure that the grip functions properly on the gun fitted with a new grip. If you do not feel competent to check the proper function yourself, we suggest visiting your gunsmith to check this for you. **It is important to test fire a pistol fitted with new grips before using in the field.**

If you have any problems installing your Hogue Grip please call us at (805) 239-1440. We will be glad to help make sure your grip fits perfectly.
